Federico Jesus Menseguez

Technical Stack Manager
Córdoba, Córdoba, Argentina

Extracto

I've been working over than 7 years as a software developer in different companies, where I have participated in different roles, which allowed me to learn different aspects of the industry from people of different cultures and with a
differentiated perspective.
Responsible, tolerant, and initiative taking, who enjoys working in teams and has the aptitude to deal with problems. Love challenges and I can manage the pressure of a fast pace
job.
In the future, I look forward to continuing working on and acquiring knowledge about last generation technologies, with different types of projects, learning from experts and trying to teach others what I have learned during the last years.

Keywords / Skill Set
.NET/.NETCore, C#, MVC, ASP.NET, SQL Server, LINQ, Entity Framework, HTML, JavaScript,
JQuery, SCRUM, Bootstrap, Angular Material, Unit Test, JSON, Web API REST, Microservices, Mongo, AngularJS, Angular 2+, Oracle PL/SQL

Relevant Web Applications / Tools:
Visual Studio, Visual Studio Code, SQLServer 2012/+, ReSharper, Team Foundation Server (TFS), Visual Basic 6, SoapUI, Jenkins, Sonar, SQLite, MongoDB, AZURE.

Experiencia

Distillery
4 años 5 meses

Technical Stack Manager
abril de 2024 - Present (5 meses)

AI-Powered Nearshore Software Development.

Distillery is a premier nearshore software development firm. At our core, we embed elite AI-enabled senior engineers and agile experts directly into our client's projects, accelerating velocity by at least 40-60%, ultimately helping our clients get digital products to market faster and driving more revenue.

Ensure that the Web Department covers .NET, Java, Angular, RoR, and DBA technologies within our clients and manage the interview process of those stacks.

Help people within my area to grow in their aspirations and plan with them the next step in our client success.

.NET Software Engineer
abril de 2020 - abril de 2024 (4 años 1 mes)
Córdoba, Argentina

Project: Scorpion – USA

Key technologies: C# .NET 5.0, SQL Server, GraphQL, Azure Services, Test, LINQ, API REST, Stored Procedures.

Project: FilmTrack – USA - Until Nov - 2020

Key technologies: C# .NET 4.5, Entity Framework, SQL Server, MVC, Unit Test, LINQ, Web API 2.0, Stored Procedures, JavaScript, jQuery, Angular.

Globant
.NET Developer Lead
agosto de 2019 - abril de 2020 (9 meses)
Provincia de Córdoba, Argentina

● Key technologies: C# .NET Core, SQL Server, Frameworks .NET Core, Unit Test (XUnit), Web API
2.0, Scrum, Azure DevOps, Entity Framework Core, Microservices, Azure

● Responsibilities: As part of the development team, I've been involved in technical definitions
about the project, architectural meetings, developments and technical research.

● As a Backend developer I've been involved in Web API endpoint creation and Unit Test of
different project layers.

● Worked in a POC, in order to find libraries that allow us to work with Excel with Macros in .NET

Core. (Interop, Aspose.Cells, Syncfusion .XlsIO)
● Worked in a POC, in order to merge excel files, with macros, styles, and data, using Aspose.Cells
library.
● Worked in a POC, Uploading and downloading files to Azure Blob Storage Service.
● Worked in Import and Export Data to Excel and creating validation Macros for them.

TIPS
.NET Fullstack Developer Lead
enero de 2019 - agosto de 2019 (8 meses)
Provincia de Córdoba, Argentina

● Key technologies: C# .NET, SQL Server, Framework: .NET 4.5, MVC, Web API, Angular 4,
Bootstrap,HTML(5), CSS(3).

● Responsibilities: As part of the development team, I've been involved in almost the entire process
like requirements, design, code. Help to the architecture team to define and implement CI/CD in
TFS. Fix critical issues. And as part of the team, participate in Scrum Ceremonies.

SOOFT Technology
.Net Developer Lead
octubre de 2016 - enero de 2019 (2 años 4 meses)
Provincia de Córdoba, Argentina

● Key technologies: C# .NET, SQL Server, Framework: DotNet Core, MVC, Web API, AngularJS, Bootstrap,HTML(5), CSS(3), Angular 2+
● Responsibilities: As part of the development team, I'm involved in almost the all process like requirements, design, code. Help to the technical leader with deployments to the different environment. Fix critical issues. And as part of the team on planning and estimation meetings.
● Front-End and Back-End: In this project, we are working on Company News Portal that as user allows you to find Benefits, News, Events and more. On Front-end we use AngularJS, HTML5, CSS. And the Back-End is code on C# with .NET Core as a framework, MVC and also we use a SQL database.

Juan Toselli Int. Tours

.Net Developer Sr.
agosto de 2016 - octubre de 2016 (3 meses)

● Key technologies: C# .NET, SQL Server, Frameworks 4.5 & Core, MVC, Unit Test, LINQ, Web API, Entity Framework, JavaScript, jQuery, AngularJS, MongoDB, HTML(5), CSS(3).

● Responsibilities: As part of the development team, I was involved in almost the all process like requirements, design, code and test. Helping to the technical leader with deployments to the different environment. Fix critical issues. And as part of the team on planning and estimation meetings.

● Front-End and Back-End: In this project, we are working on a travel e-Commerce that as user allows you to find an Hotel, Excursion or packages so you can plan your vacations by your own easy and fast. On Front-end we use AngularJS, Jquery, HTML5, CSS. And Back-End we develop on C# with .NET Core as a framework, MVC and Entity Framework also we use a SQL database and a MongoDB.

● With Scrum Methodology, I've contributed to planning meetings and sprint estimations to build a schedule of work for each successive sprint.

● General code review to improve quality. At the same time, coordinate and supervise unit test for new functionality to reach a better coverage. We used Jenkins for CI (continuous integration).

Globant
.NET Developer
noviembre de 2014 - mayo de 2016 (1 año 7 meses)
Capitalinas Cordoba

.Net Developer at Deloitte – USA

● Key technologies: C# .NET, SQL Server, Frameworks 4.0 & 4.5, MVC, Unit Test, Web API 2.0, Stored Procedures, JavaScript, jQuery, AngularJS, WPF, MongoDB, HTML(5), CSS(3).

● Front-End and Back-End: I worked in a project that involved the development of .Net applications for internal use as well for external employees of Deloitte. We created an environment to storage electronic records based on employee's role. The name of the project was Federal Records Management System and it allowed to create archives, folders and records (Web API 2.0, REST Services that support the MVC application), to manage role and access for customer (C# in BackEnd, JQuery, Javascript and AngularJS in FrontEnd), to generate reports (Store Procedures to process multitables) and basic and advanced search (JSON and MongoDB).

● Create a desktop application to be utilized for uploading records into the system using easy drag-and-drop functionality. This component works in

offline or online mode. We used FTP Service to upload records (WPF in FrontEnd), WCF to get and post data and SQLite database to save data in the customer computers.

● With Scrum Methodology, I've contributed to planning and sprint estimations to build a schedule of work for each successive sprint.

● General code review to improve quality. At the same time, coordinate and supervise unit test for new functionality to reach a better coverage. We used Jenkins and Sonar for CI (continuous integration).

● Mentor junior programmers to improve their skills in back-end; encouraged knowledge sharing of best coding practices, troubleshooting of issues and bugs etc.

● Improve the performance of store procedures in SQL Server to generate reports for the web application.

● Manage TFS to create new branch of coding. Afterwards, merge the code with the main branch to deploy applications to production.

● Work with SoapUI to testing RESTful web services and their resources, representations, etc.

Hewlett-Packard
Service Information Developer
septiembre de 2012 - noviembre de 2014 (2 años 3 meses)
Cordoba Argentina

.Service information Developer for Ally Bank – USA

● Key technologies: VB.NET, SharePoint, ASP.NET, VBScripts, EasyTrieve, COBOL, JCL .

● CARS / Back-End development: I worked in a project that involved the development of a COBOL applications for Ally Bank. The application was related to support the main activity of Ally that is Car selling for different countries, mainly in USA. The name of the project was CARS and it allowed to Create a new Branch for sellers, create a new Account for a new client, track payments, refounds, and account updates during all life cycle of Account, and also generate reports for a different bank areas. (COBOL,EasyTrieve, JCL, IMS database).

● We created a web application to be utilized for the all development instance, starting for the request of changes created by an Ally Requester, then the estimation, development, and testing, finishing with Implementation and post deployment supports. (On BackEnd: SharePoint, ASP.NET,SQL Server and in FrontEnd: HTML, CSS, JavaScript)

- I was involved in client meetings, also requirements definition, planning, development, unit tests, and support for the quality cycles, and implementations.
- General code review to improve quality (WPR). Also, supervised unit test for new functionality to reach a better coverage. (Test Cycle Support)
- CMMI Level 5

Harriague + Asociados
HELP DESK
noviembre de 2011 - septiembre de 2012 (11 meses)
Córdoba, Argentina

Provided support to Tarjeta Naranja's employees
Performing fault diagnosis, providing information to them about different process, solving the problems presented by a call related with PCs fails or configuration fails.
Also Fixing issues received by email or tickets, and if we could not fix them I had to redirect them to the back office area.
